Treasure Valley Home Maintenance Checklist

Use with our Boise Home Maintenance Guide. Work the season you are in - fall and spring carry the most.

Fall (finish before the first hard freeze, typically mid-October)

[ ] Clean gutters after leaf drop; confirm downspouts discharge away from the house
[ ] Disconnect garden hoses; insulate exterior hose bibs
[ ] Schedule sprinkler system blowout
[ ] Replace furnace filter; book heating service if due
[ ] Caulk exterior gaps; renew door weatherstripping and sweeps
[ ] Eyeball roof and flashing from the ground for lifted shingles
[ ] Test smoke and CO detectors; replace batteries

Winter (watch, and fix small things indoors)

[ ] Watch eaves for icicles and ice dams (a sign of attic heat loss)
[ ] Check window sills for condensation pooling
[ ] Note drafts at doors and outlets on cold nights for the caulk list
[ ] Swap furnace filter mid-season
[ ] Keep snow shoveled away from the foundation on the sunny side
[ ] Good season for interior patching, painting, and tub re-caulking

Spring (audit what winter did)

[ ] Walk all four exterior sides: paint, caulk, siding, trim
[ ] Check fence posts and gates after the windy months
[ ] Screwdriver-test deck boards, rails, and stairs for soft wood
[ ] Start sprinklers zone by zone; re-aim heads hitting the house or fence
[ ] Reconnect hoses; watch each bib for leaks from winter freezing
[ ] Check ceilings and window surrounds indoors for new stains

Summer (projects and sun protection)

[ ] Touch up exterior paint on south- and west-facing trim
[ ] Re-stain or seal the deck in the dry window
[ ] Replace warped fence boards; re-screw popped pickets
[ ] Keep AC condenser clear of cottonwood fluff and debris
[ ] Confirm sprinklers water plants, not siding

Every month: the five-minute water check

[ ] Touch the back corners under every sink
[ ] Glance at ceilings below bathrooms
[ ] Look at the floor around the water heater and toilets
[ ] After hard rain, see where the gutters actually put the water
